

# **AMPELOGRAPHY AND VITICULTURAL GEOGRAPHY**

**(Technology and quality control of beverages, 1<sup>st</sup> Year of study, 2<sup>nd</sup> Semester)**

**Credits (ECTS): 8**

**Course category:** Core discipline

**Course holder:** Prof. Liliana ROTARU ,PhD

**Objectives of the discipline:**

- Acquisition, capitalization and deepening of the basic concepts in the field of ampelography and viticultural geography;
- Knowledge of wine regions and vineyards in Romania and worldwide;
- Existing interrelationships of the main components of the viticultural ecosystem, their use in the zoning of grapevine varieties;
- Evaluation of the agrobiological and technological potential of grapevine varieties, for table grapes and wine under the conditions of climate change, in order to complete the existing viticultural assortments with new grapevine varieties and clones.
- Knowledge of the main grape varieties grown in Romania and worldwide;
- Acquiring the principles underlying the choice and zoning of vine varieties;
- Application of the knowledge of ampelography and geography in the understanding of viticultural practices;
- Learning the ability to scientifically analyze the current problems of world viticulture.

**Contents (syllabus)**

<b>Course (chapters/subchapters)</b>
1. Introduction to the notions of ampelography and elements of viticultural geography
2. The viticultural ecosystem, as an integral part of the biosphere
3. The main grape varieties for white wines
4. The main varieties for red wines
5. The elements used in the zoning of grapevine varieties
6. The wine-growing regions of Romania
7. The assortments of vineyards in Romania
8. Viticulture on the continent of Europe
9. Viticulture on the North American continent
10. Viticulture on the continent of South America
11. Viticulture on the continent of Australia
12. Viticulture on the continent of Asia
13. Viticulture on the continent of Africa

**Practical activity**

1. Recognition of the main grape varieties for white wines
2. Recognition of the main grape varieties for red wines
3. Practical applications regarding the calculation of the elements used in the zoning of vine varieties

4. Establishing the main ecopedoclimatic characteristics of the wine-growing regions in Romania
5. Analysis of the wine sector in Europe
6. Analysis of the wine sector in North America
7. Analysis of the wine sector in South America
8. Analysis of the Australian wine sector
9. Analysis of the wine sector in Asia
10. Analysis of the wine sector in Africa
11. Presentation of a report / essay on a given topic
12. Study visits to various vineyards
