

## M.Sc. in Sustainable Agriculture (120 ECTS)

The postgraduate on Sustainable Agriculture is a two-year programme for graduates holding a university Bachelor degree in Agriculture or other related sciences leading to a Master of Science degree (120 ECTS).

In the first year participants follow the programme to: i) be introduced to agroecology, environmental indicators of integrated crop management and organic farming systems; ii) familiarize themselves with the certification systems of environmentally friendly and sustainable agricultural production; iii) present the latest advances in the management of soil, water and genetic resources in agriculture; iv) be exposed to a thorough background of crop protection; v) get acquainted with automation and modern recycled soilless greenhouse production methods; and vi) understand innova-

tion and communication for sustainable farming.

The qualified first-year graduates are entitled to pursue their research in an environment fully equipped with the most updated facilities.

In the second year, students who have successfully completed the first year according to the CIHEAM/MAICh specific regulations develop a thesis based on research work.

Upon completion of the first part of the programme, the Master of MAICh (60 ECTS) is delivered under the conditions stated in the CIHEAM/MAICh specific regulations.

The scientific results of graduate studies are usually announced in International Conferences and/or published in world-renowned journals.

### Scholarships

Qualified candidates may be eligible for scholarship covering fully or partly: tuition, teaching material, board, lodging, health insurance and compensation.

### Research Activities

- ▶ Evaluation of compost use as a substrate in hydroponic systems and plant nutrition
- ▶ Study of mediterranean insect pests activity and their bio-ecological characteristics
- ▶ Host-virus interactions essential for virus replication and resistance
- ▶ Genetic basis of weeds resistance to herbicides
- ▶ Comparison of nutrient and energy budgets of conventional and organic farming systems as environmental indicators

### Requirements

Applicants must have the academic level that qualifies them to undertake postgraduate level studies in their home country or equivalent to a minimum of four years undergraduate studies. Their degree must also be in a discipline compatible with the area of specialization requested. Additional conditions may be required for certain programmes.

The working language of MAICh is English. Selection is made on the basis of the files submitted by applicants – priority

being given to applicants from CIHEAM member countries, and takes account of their academic results, professional experience acquired in the chosen field of specialization, reference letters and their competence in English.

The documentation required by MAICh includes:

1. Academic records and transcripts
2. Graduation degree
3. Proof of english language competence
4. Two letters of recommendation.

### How to Apply

Applications to study at MAICh must be made through the online application form that can be accessed by this link:

<http://www.maich.gr/admissions/application>

### Information

For more information, visit our website at: <http://www.maich.gr/sust> or send inquiries to [livieratos@maich.gr](mailto:livieratos@maich.gr)

## Educational Sequence

The programme is organized in 7 Units (60 ECTS)

### Semester I

07 October 2013 — 14 February 2014

#### SAG520.11512.0 - INTRODUCTION TO SUSTAINABILITY (15 ECTS)

Content: Agroecosystems and Population Dynamics  
Agro-Environmental Impact Assessment and Farm Management  
Ecotoxicology  
Quality Assurance & Good Agriculture Practices

#### SAG530.1712.0 - NATURAL RESOURCES MANAGEMENT (7 ECTS)

Content: Soil Properties and Quality Assessment  
Composting Technology  
Nutrient Management and Soil Fertility Improvement

#### SAG540.1810.0 - ASSESSMENT OF GENETIC RESOURCES (8 ECTS)

Content: Seed Production and Quality Management  
Plant Breeding  
Agro-Biodiversity Assessment and Management

### Semester II

17 February 2014 — 20 June 2014

#### SAG550.11510.0 - CROP PROTECTION (15 ECTS)

Content: IPM  
Fungal and Bacterial Disease Management  
Detection and Epidemiology of Plant Virus Diseases  
Insect Management  
Weed Management

#### SAG560.1612.0 - GREENHOUSE MANAGEMENT (6 ECTS)

Content: Greenhouse Technologies & Climate Control  
Soilless Cultivation

#### SAG510.1312.0 - BIOMETRICS (3 ECTS)

Content: Crop experimentation

#### SAG572.1312.1 - INNOVATION AND COMMUNICATION IN SUSTAINABLE FARMING (3 ECTS)

#### SAG500.1312.0 - EXTENDED ESSAY (3 ECTS)

## Part 2 - The Master of Science Program (Project - 9 months duration, 60 ECTS)

Independently of the thesis thematic area, students acquire standard common competencies such as literature reviewing, hypothesis formulation and experimental design, sampling and collection of data, statistical analysis of acquired measurements, scientific writing and critical interpretation of results. Linked to the thematic area of their research

work, students gain specific competencies that might fall in different groups: molecular biology techniques, soil and leaves lab analytical methods, sugars and antioxidants measurements in fruits, chlorophyll and carotenoids analysis in leaves, operation of fully automated hydroponics system
